The PASS Product Line

Today's Payment Environment

Technology has grown exponentially more powerful and customer-friendly while the point of sale has gotten more costly and complex.

TSYS is reducing the risk of innovation. Through the Infonox suite of products – CounterPASS, WebPASS, MobilePASS, KioskPASS and MultiPASS – merchants and retailers can deliver cost-saving and revenue-generating payments applications across any network, over any payment device, at every POS.

We do this with a platform called TransIT.

The PASS Product Line

The TransIT Platform

TransIT was developed by Infonox, a TSYS company, to address the challenges that stand between retailers and the execution of their strategies at the store level.

Step by step we are removing the obstacles that complicate a merchant payment experience. TransIT and the PASS products bring:

- No third party set-up
- Centralized reporting (Merchant Center)
- One phone number for support
- A Host based system reducing PCI concerns
- Enhanced acquiring / merchant communication
- New revenue streams through monthly service fees
- Non-traditional value added services

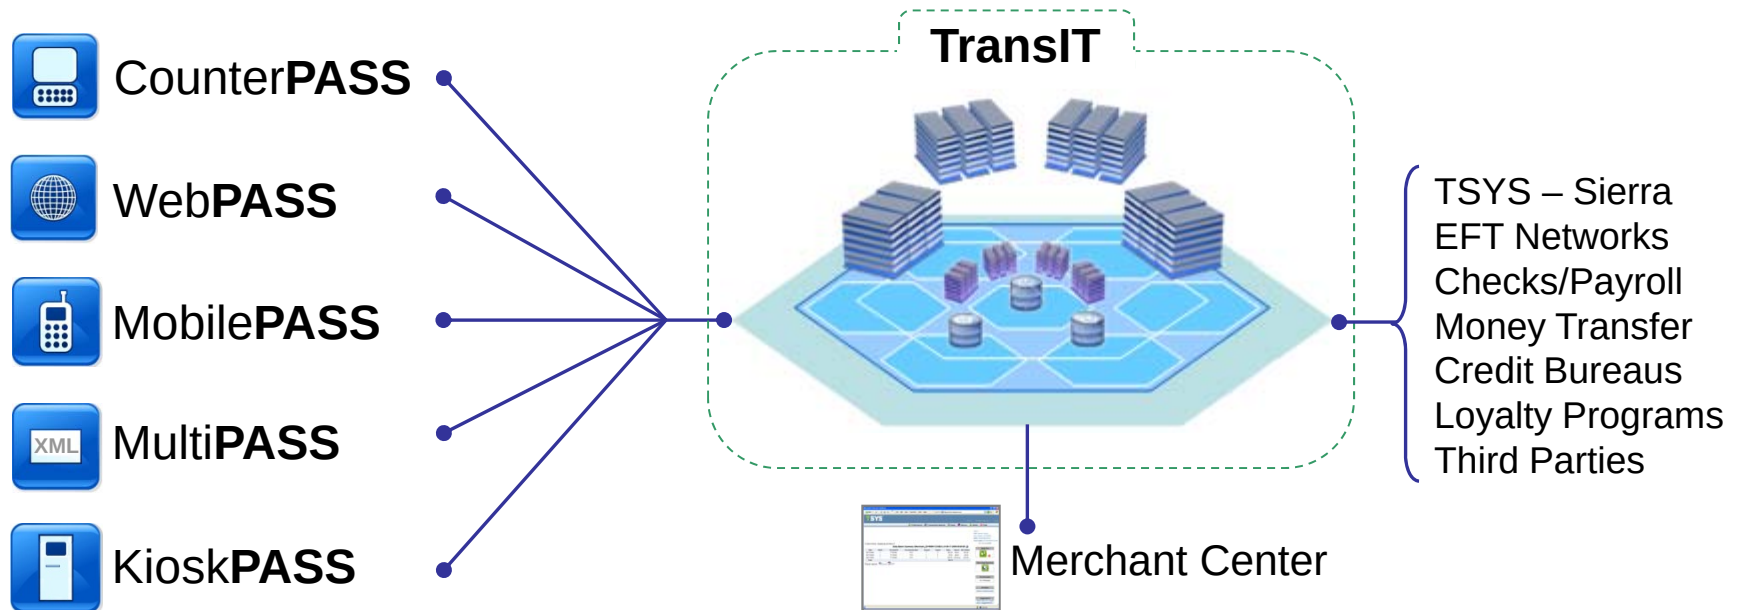

The PASS Product Line

TransIT Integration

TransIT™ is a platform for building, interfacing, operating, driving, switching, processing and supporting multiple payment forms, value-add services and systems management services.

The PASS Product Line

CounterPASS

Counter**PASS** is a PC-based point-of-sale with more payment types, security and functionality than typically available with traditional counter top terminals.

Counter**PASS** features and benefits:

- True thin-client - instant updates
- Swiped or manual credit cards / signature debit
- Easy-to-set-up recurring payments
- Email and/or print receipts
- SSL transactions w/ 128-bit encryption
- Full branding by Acquirer*
- Multiple peripherals supported
- Transactions:
 - Credit – All credit cards
 - Debit – Pin and Signature

The PASS Product Line

WebPASS

Web**PASS** is for merchants who accept mail or telephone orders need a powerful solution that offers secure Internet payment processing with an easy-to-use interface.

Web**PASS** features and benefits:

- Acceptance for all card types
- Easy-to-set-up recurring payments
- Automatic software compliance updates
- Automatic batch processing to reduce transaction downgrades or missed batch windows
- Real-time transaction processing and immediate invoice creation at the time of sale
- Dashboard reports provide real-time access to transaction activity and easily export to Microsoft Excel

The PASS Product Line

MobilePASS

Mobile**PASS** is a smartphone-based payments application for on-the-go merchants enabling them to accept and process card payments anywhere they have cellular service.

Mobile**PASS** features and benefits:

- Swiped or manual credit cards / signature debit
- Email and/or print receipts
- Supports V-Code and AVS
- Provides instant access to real-time reporting
- SSL transactions w/128-bit encryption
- PCI PA-DSS certification
- Offers card-present interchange rates with optional Bluetooth magnetic stripe reader and thermal printer
- Takes the business to the customer, offering consumers choice, flexibility, and convenience

Supported Peripherals

Available exclusively through TSYS POS Systems, MobilePASS supports an optional Bluetooth magnetic stripe reader and thermal printer. The PayMate Pro 200 qualifies transactions for card present interchange rates and prints receipts on-the-spot.

PayMate Pro 200 package includes:

- PayMate Pro 200 (Qty 1)
- Battery (1100mA) (Qty 1)
- Battery Charger (Qty 1)
- Adaptor & Cable (Qty 1)
- Printer Paper rolls (Qty 2)

Optional Equipment:

- Car Charger
- Spare Battery
- Leather carrying case (belt clip)

The PASS Product Line

KioskPASS

The screenshot displays the TSYs Merchant Center interface in a Microsoft Internet Explorer browser window. The address bar shows the URL <https://www.mreports.com>. The page features a navigation bar with links for Home, Change Password, Logout, Preferences, Transaction Reports, News, Library, Alerts, and Help. The main content area displays a 'Daily Batch Summary (Merchant_ID=590611210821) of 06-17-2009 00:00:00'. Below the title is a table with 9 columns: Date, Batch, Terminal ID, Terminal Number, Swiped, Keypad, Sales, Return, and Net Settled. The table contains 3 rows of data for the date 06/17/2009, with a total row at the bottom. To the right of the table, there are sidebar sections for Web Pass, Recurring Payments, My Messages, My News, and Suggestions. A dropdown menu is open over the 'Transaction Reports' link, listing various report types.

Date	Batch	Terminal ID	Terminal Number	Swiped	Keypad	Sales	Return	Net Settled
06/17/2009	5	77123456	1515	7	2	\$33.29	\$0.00	\$33.29
06/17/2009	6	77123456	1515	1	2	\$2.50	\$8.00	-\$5.50
06/17/2009	7	77123456	1515	6	1	\$27.52	\$12.52	\$15.00
Total						\$63.31
